# Anna Truong

annatruong.github.io        github.com/annatruong

Reliable, detail-oriented professional skilled in building automation solutions and data-driven applications. Proficient in deploying and managing applications on Google Cloud Platform (GCP) and leveraging CI/CD pipelines for automated integration and deployment.

## Work Experience

**Backend Developer - Acuto (October 2022 - February 2025)**
- Developed and maintained automation solutions and applications using JavaScript, Node.js and TypeScript to enhance business data analysis capabilities.
- Led the deployment and management of applications on Google Cloud Platform (GCP), implementing automated configurations and best practices to ensure seamless team collaboration and efficient operations.

**Solutions Consultant - Acuto (October 2021 - October 2022)**
- Developed automation tools using JavaScript and Node.js, deployed via cloud functions, to streamline daily tasks for small marketing agencies.
- Collaborated with marketing teams to identify opportunities for technology to replace manual processes.

**Data Handler - ICTS Europe System (July 2021 - August 2021)**
- Extracting and processing data from documentation for an automated system.
- Ensuring that data is accurate, complete and well comprehended on the user interface.

**Account Manager & Reporting Specialist  - Brainlabs (November 2018 - July 2021)**
- Designed and implemented automated processes and performance dashboards to optimise search campaigns and streamline reporting workflows for biddable teams.
- Provided in-depth reporting consultancy and insights to clients, delivering data-driven recommendations to enhance campaign performance.

**Account Executive  - Brainlabs (May 2015 - November 2018)**
- Built and managed search campaigns while auditing accounts to identify optimisation opportunities and ensure compliance with best practices.
- Delivered training sessions and created user guides for internal teams to support the effective adoption of technical tools.
